

Nicola Lakeshore Estates Inc.

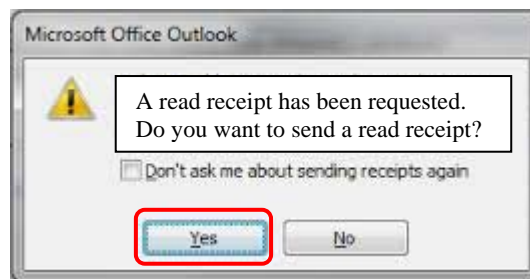

MEMORANDUM

DATE: November 23, 2016
TO: All Lot Owners
FROM: Frank Rizzardo
SUBJECT: **Potable Water Consumption Advisory**

The most recent arsenic level test result was 0.0113, which is marginally over the Maximum Acceptable Concentration of 0.0100. We must notify all residents of the test result and keep all informed on all interim results as well as the next lab test result. We are taking action to bring levels into compliance. All test results are posted on the Nicola Lakeshore Estates website – <http://www.nicolaestates.com/owners.html>

I also suggest that residents review our previous information on standard 58 reverse osmosis filters for installation in any situation of drinking and cooking use of water.

Thank you for your cooperation.
